

Complete enterprise workflow management and automation

Connect documents with people and processes, from the moment information are captured.

Quickly diagram and launch business process workflows.

Start, approve and monitor business processes from smartphones and tablets.

Increase staff productivity with automated e-mail notifications, document routing and reporting.

Kick off processes with digital forms with built-in routing, review and approval workflows.

One standard for document use

Unite document imaging and document management in one central enterprise information management system.

Replace unorganized file cabinets, network drives and legacy systems with accessible and searchable digital repositories.

Eliminate time-consuming data entry with high-volume document capture of scanned and electronic documents.

Find content instantly with dynamic search and retrieval options.

Import content from mobile devices, network drives, MFPs and scanners.
